Assets are managed by Prudential Investment Managers (South Africa) (Pty) Ltd, which is an approved discretionary Financial Services Provider (#45199). Collective Investment Schemes (unit trusts) are generally medium to long-term investments. The value of participatory interest (units) may go down as well as up. Unit trust prices are calculated on a net asset value basis, which for money market funds is the total book value of all assets in the portfolio divided by the number of units in issue. Fluctuations or movements in exchange rates may also be the cause of the value of underlying international investments going up or down. Unit trusts are traded at ruling prices. Commissions and incentives may be paid and if so, would be included in the overall costs. Different classes of units apply to the Prudential Collective Investment Scheme Funds and are subject to different fees and charges. A detailed schedule of fees and charges and maximum commissions is available on request from the company. Forward pricing is used. All of the unit trusts may be capped at any time in order for them to be managed in accordance with their mandates. Performance figures are sourced from Morningstar and are based on lump sum investments using NAV prices with gross income reinvested.
